MEMORANDUM FOR THE RECORD

SUBJECT: Community Issues Surfaced at CIA Budget Review

During Mr. Colby's review of the CIA Budget on 21 July, the following issues were identified which had community ramifications, i.e., that could perhaps be more effectively resolved in a community context:

1. What was the proper mix of CIA and DIA personnel (both PI's and support personnel) in NPIC? Could a higher proportion of DIA personnel relieve the current squeeze on NPIC manpower?

2. What use was to be made of the top floor of the NPIC Building? If CIA has no use for it, could it be usefully employed by some other element of the community?

5. How are net assessment responsibilities apportioned around the community?

6. Would consolidation of at least some parts of CIA's mapping resources with Defense mapping make sense?
